

# TECHCXO™

Interim, Part-Time and On-Demand Executives  
Interim CEO

## Real Results

Many of our 1000+ clients have taken capital during our tenure. We have created more than \$5B in value via incremental sales and capital raises, and helping on M&A, exits and other transactions for our clients.

.....

## Consistent Growth

TechCXO leads by example. We have been on the INC 500/5000 Fastest Growing Private Companies list for 10 straight years.

.....

## Ready When and Where Needed

Our ready-when-you-are capability includes executives and integrated teams in **Atlanta, Boston, Carolinas, Chicago/Great Lakes, Dallas, Denver, DC/Mid-Atlantic, Florida, Houston, Nashville** and **New York**.

Why we're different...

## The TechCXO

# DIFFERENCE

We began from the belief that high potential companies can benefit from proven interim or fractional executives whom they otherwise may not be able to access, afford, or because they are not needed full-time.

## Interim CEO

An interim CEO is typically appointed by the board of directors to assume the CEO role during a time of transition, turmoil or as the result of the sudden departure of the company's previous CEO. While they carry the moniker of "interim" CEO, they assume full responsibility and bring the following focus:

- **Proven Expertise** - An experienced interim CEO from TechCXO comes to your company having successfully served multiple clients as its chief executive and has completed a variety engagements as an interim CEO. They are ready to take on challenges and positively impact your business quickly.
- **Immediately Available, Financially Viable Model** - An interim CEO is accountable for results immediately without the cost and burden of long-term contracts, equity, severance and benefits. They can help speed your CEO search, as well.
- **Time to Value** - TechCXO moves quickly through evaluation of needs and priorities, an operational roadmap, scope and statement of work to get down to working on your needs quickly. Our executives have little to no learning curve given their experience.
